Data Quality

Data Quality & Reconciliation

Validation results from the bronze → silver → gold pipeline for hotel bookings. Each metric compares raw ingested rows against cleaning and rejection outcomes.

Pipeline Validation Checks

Validation Check Details

check_metric	row_count
Bronze rows ingested	1316
Duplicate booking IDs	26
Invalid stay dates (check-out not after check-in)	12
Missing city	12
Missing total amount	17
Missing nights	27
Missing booking channel	13
